

(a) Upon slow expansion:

$t=0.0 \times 10^6 \tau$, $h=10.0 \sigma$

$t=0.6 \times 10^6 \tau$, $h=13.1 \sigma$

$t=1.2 \times 10^6 \tau$, $h=15.1 \sigma$

(b) Upon fast expansion:

$t=0.0 \times 10^6 \tau$, $h=16.5 \sigma$

$t=0.6 \times 10^6 \tau$, $h=12.1 \sigma$

$t=1.2 \times 10^6 \tau$, $h=14.3 \sigma$
